Key Experience

“Cloud X” Festival - Video Editing

Six reels for social media of artist and audience interviews at a music festival [see clip 3 of showreel].

Key lessons:

- Using Premiere’s “Enhanced Audio” feature on clips with difficult outdoor audio. Finding the right balance of settings (mix amount, EQ, noise reduction, rumble reduction, vocal enhancer, etc) to achieve a result with clear, but not over-processed audio. My background in music production and sound design helps immensely with this and all other audio aspects of editing.
- Achieving pacing that naturally flows with the music, dialogue and cuts. Using every aspect of the edit (A-roll, B-roll, changes in the music, frequent cuts for visual stimulation, running two interviews parallel and cutting between, etc) to aid in attaining such pacing that has a feeling of pure flow; what I believe to be one of the most important, yet abstract, elements of video editing.
